EDUCATION

The University of Texas at Dallas Richardson, TX
B.S., Computer Science I Aug 2026 – May 2030

EXPERIENCE

ACM Projects Sep 2026 – Present
Software Developer, Clario (team of 4 with an industry mentor and a product manager)

- Developed a FastAPI endpoint integrating Google's Gemini API with a React and TypeScript frontend, enabling AI-generated interview feedback through REST API communication.
- Engineered a React and TypeScript problem library featuring 100 coding challenges, implementing dynamic search, difficulty-based filtering, and reusable UI components to streamline problem discovery.
- Implemented API error handling and fallback states to improve reliability and provide clear feedback when backend requests fail.
- Designed PostgreSQL data structures in Supabase to support repository-based debugging interviews and authored 20 debugging exercises.
- Collaborated within a four-person engineering team alongside an industry mentor and product manager to develop an interactive technical interview platform.

Leadership Initiatives Aug 2024 – Apr 2025
Lead Business Intern

- Partnered with a Nigeria-based business owner to build a tailoring brand from the ground up, translating business goals into a branding and go-to-market strategy
- Developed a launch plan spanning advertising, brand identity, business proposal, budgeting, and social media strategy
- Led a 6-person team through weekly meetings, coordinating execution with stakeholder goals and project priorities
- Secured $500+ in funding over 35 weeks to support planned business initiatives

PROJECTS

BrewBuddy | Personal | Jan 2026 – Present
React, Vercel, Git, GitHub

- Developed and deployed a gamified Pomodoro productivity application featuring four interactive virtual cafés, customizable study timers, and automated work/break transitions.
- Implemented a JavaScript-based reward economy with shared virtual currency, time-based coin accumulation, and character-specific purchases across four café environments.
- Integrated browser-based persistence using localStorage to retain user preferences, notes, checklists, rewards, and timer configurations across sessions.
- Built interactive character dialogue animations and customizable study environments with embedded Spotify playlists and YouTube backgrounds.

DevTrack | Personal | Sep 2024 – Present
HTML, CSS, JS, Vercel, Git, GitHub

- Developed an interactive STEM career exploration platform featuring a 28-question assessment and personalized career recommendations.
- Implemented a rule-based recommendation algorithm using weighted scoring to evaluate user interests and identify matching technology career pathways.
- Built dynamic questionnaire rendering and results generation using JavaScript DOM manipulation, displaying career-specific educational opportunities and industry insights.

Maddie's STEMAventure | Amazon KDP | Aug 2023 – Present

- Co-authored and published a STEM-focused children's book with 15+ Girls Who Code members through Amazon Kindle Direct Publishing

TECHNICAL SKILLS

Product: User Research, Surveys, Feature Prioritization, Product Strategy, Go-to-Market Strategy, UI/UX Design, Case Study Development
Technical: Python, TypeScript, JavaScript, HTML/CSS, React, Tailwind CSS, FastAPI, Git, GitHub, Vercel, Figma
